

My Orange

Overview	An application for Orange users to easily follow up on their consumption and control their line
Pros	<ul style="list-style-type: none"> - The Home screen has the user's plan - Has a Find a store service - Has a Help feature - Has a Reserve your turn service - Uses welcoming words like Hello to feel friendly and close - Have lots of entertainment options and offers to keep the user more engaged and hooked
Cons	<ul style="list-style-type: none"> - Log in screen is too simple, basic and feels like it doesn't have much of Orange identity (an image or something that grabs the user's attention) - The differentiation between the regular content, the headlines and the call to actions is not really clear - The call to action buttons are too small and not grabbing the user's attention clear - The widgets used are not the orange color or doesn't have it at all (they're all in black) - The consistency and similarity are weak and poor - The used font size is a bit small and hard to read - There is no search option - The widgets alignment is weak
